

Why should the NAB be able to dictate what I listen to for a service I pay for? Am I limited to what newspaper I am allowed to read? Can't I live in LA and find out the weather in Dallas by picking up a USA today? I use the traffic service a lot as I travel the L.A. freeways while conducting business and rely on this service. I am very upset that there is a possibility that I may lose this ability and have to get it off AM radio! I DON'T WANT TO LISTEN TO THE RADIO! I pay for the XM service so I do not have to.

The NAB has a 1940 mentality and feels that that they are entitled to force me to be a listener of local radio...Wake up it is 2004 and times have changed. If they were so concerned with my well being they should have spent the money they have spent on lobbyists the past 50 years and put that money into providing real services that a technological driven society desires. This really is an injustice that they even have a say and I encourage you to oppose HR 4026
